FACILITIES, GENERAL.

*** The facility is currently housing a North American Porcupine in the upstairs room and area of the home. The animal has free access to an area that is not designed for the animal but is a living space for the licensee, so there are a variety of potential hazards for this animal. There was an enclosure the animal is secured in nightly but the area does not provide enough vertical space for species appropriate movement. This animal needs to be housed in a primary enclosure that meets its species specific needs and is designed to protect the animals from injury and to contain the animal.

Correct by: Aug 30, 2014

An exit briefing was conducted with the licensee at the time of the inspection.
