### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

There were at least 3 goats noted to be thin during this inspection. A tri color (light tan, white, and black) female goat with ear tag # 0244, approximately 3 months old and tri color (dark tan, white and black) female goat with ear tag # 0248, approximately 3 months old had exposed hip bones and were thin on both sides. A tan, adult female, fainting goat with ear tag # 0238 also had exposed hip bones and was thin on both sides. Manager stated that these goats were just dewormed this morning with ivermectin paste. There were no records to determine which animals were observe to be thin or which animals were treated with ivermectin. A used tube of invernectin paste 1.87 % was present during this inspection. Treatment records were started by the manager during this inspection including the name of the ivermectin, concentration, dose, and route of administration.

Animals with veterinary problems must be identified and treated appropriately to prevent worsening of the conditions. Additionally, the licensee must provide documentation of animals receiving treatment to APHIS Officials upon request. Correct from this day forward.

### 2.126(a)(2)

#### ACCESS AND INSPECTION OF RECORDS AND PROPERTY; SUBMISSION OF ITINERARIES.

There were no acquisition records, record of animals on hand, or program of veterinary care present at time of this inspection. Licensee stated via phone call that he had all the records in his vehicle, but was traveling today to a different location. Records of current animals on hand and a copy of the program of veterinary care must be present for APHIS Officials to review during the inspection. These records are necessary to document ownership, track animals, and to access the health of the animals. Correct by July 17, 2017.

\* This inspection was conducted in Delta, PA.

This inspection and exit interview were conducted with the manager.
