Certificate: 58-C-0460

Site: 001

ZOOWORLD ZOOLOGICAL & BOTANICAL CONSERVATORY

Type: ROUTINE INSPECTION

Date: 07-MAY-2015

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

***The wolf, Montana, is expressing irritation from the flies biting his ears. The facility stated that this is a seasonal issue in which the attending veterinarian had instructed them how to treat the condition when it occurs. This treatment has been administered but the flies are still biting the wolves' ears and the condition still persists. The tips of the ears appears to have a scab in some areas and in other areas it is open with the flies actively biting. The wolves are displaying irritation by running their ears across the fencing. When a condition persists after the instructed treatment given by the attending veterinarian is administered and is then inadequate, the veterinarian should then be consulted on further actions that need to be taken to ensure good health and well-being of the animals. Correct by May 11, 2015

3.75(c)(3)

HOUSING FACILITIES, GENERAL.

***The ringtail lemurs housing on the island has an accumulation of dirt and other debris within their dens. They hadn't been cleaned the day before. The dens should be cleaned as often as necessary to satisfy generally accepted husbandry and to minimize disease hazards. Correct by May 11, 2015

3.125(a) REPEAT

FACILITIES, GENERAL.

***In the wolves second back portion of their primary enclosure toward the front right corner there is a hole approximately 1 foot in diameter and so deep that you can't visualize the end of the hole. This hole needs to be filled to prevent injury of the animals.

3.131(c)

SANITATION.

***The guillotine doors to the otters den had some kind of caked on residue on the inside of it. The bottoms of the inside parts of the door have not been cleaned. The dens should be cleaned to minimize disease hazards. Correct by May 11, 2015.

Prepared By: ANNETTE CHAPMAN, D V M USDA, APHIS, Animal Care

Date:
08-MAY-2015

Inspection Report

***The inside of the storm drains used as shelter in the wolves enclosure have not been cleaned. The inside of the drains towards the opening is covered in a green growth indicating the surface has not been cleaned. These should be cleaned to minimize disease hazards. Correct by May 11, 2015.

The lemur incident and lights cited on the previous inspection is still open and under review. The public barriers cited on the previous inspection have been corrected.

The inspection and exit briefing was conducted with the Director.
