Shirley Farms
2557 SOUTH BLUFF RD
OBION, TN 38240

Customer ID: **44856**
Certificate: **63-C-0201**
Site: 001
SHIRLEY FARMS

Type: RE-LICENSE INSPECTION
Date: 25-APR-2023

2.75(b)(1)

Records: Dealers and exhibitors.

The current Record of Animals on Hand needs to be updated to reflect the correct acquisition and disposition for the animals on site as follows:

*The recently acquired kangaroo and marmoset have their acquisition dates listed in the column listed as date died. The two animals are still alive.

*Four more sheep are listed on the records than are present on the premises. The disposition for the four sheep needs to be documented.

*The number of goats listed is not accurate.

Accurate records are necessary to allow for legal and medical tracing of the animals.

The facility shall make, keep, and maintain records or forms which fully and correctly disclose the required information for all animals other than dogs and cats, purchased or otherwise acquired, owned, held, leased, or otherwise their possession or which are transported, sold, euthanized, or otherwise disposed of including any offspring born on the property. The records should include the name/address/USDA number or drivers license number and state/vehicle number and state and date of acquisition for all animals acquired and the name/address/date for all animals sold. For offspring, record the date and species born on site.

Inspection Report

3.125(a)

Repeat

Facilities, general.

The following housing enclosures are in need of repair:

*The outside portion of the kangaroo enclosure has a sheet of metal that is bent outwards/loose projecting from the barn.

The metal needs to be moved back into place/repared.

*A portion of one side of the alpaca fence behind the monkey barn is leaning because the posts are leaning secondary to the wind storm. The fence posts and fence need to be straightened.

*One approximately ten foot long section of temporary fencing for the goat pen is shorter (less than four foot high) than the rest of the goat fencing. The adult male goat was seen jumping over this section of the enclosure fencing. The height of the fence in this section needs to be increased to keep the male goat from jumping or he can be placed in another enclosure with a taller fence that will keep him contained.

*The alpacas currently have access to the barn for shade and shelter. The entry up into the barn is over a foot high which makes it difficult for them to access the barn. An addition to the access point to the barn is necessary to allow the alpaca to easily access the barn.

The outdoor housing facilities shall be structurally sound for and shall be maintained in good repair to protect the animals from injury and to contain the animals.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspection(s) or by 60 days counted from today (June 24, 2023) or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your
