### 3.131(a)

#### SANITATION.

Enclosure # 23 had an accumulation of old, wet, moldy, hay/leaf mixture on the elevated resting surface. Upon further inspection of this hay mixture, it was discovered that the underlying wooden surface was wet, spongy, deteriorating, and no longer structurally sound to safely support the weight of this serval.

If this bedding is being used on this type of wooden surface, it shall be changed more frequently to prevent moisture buildup, mold, and deterioration
