ALLEN NOLT

Type: ROUTINE INSPECTION
Date: 30-NOV-2017

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

*** A male Cavalier identified as # 183 was heavily matted behind the ears, underneath neck and behind the rear legs. Once the fur becomes matted, it pulls and separates from the skin causing potential skin irritations. This dog needs to be groomed on a routine basis to prevent matting and for the comfort of the dog.

A bichon identified as #157 was favoring the right rear foot and upon closer observation the skin between the pads was red, irritated and swollen. The inside of both ears were red with brownish grainy discharge. Scabs were present at the base of both ears, likely from scratching. This dog should be assessed by the attending veterinarian for diagnosis and treatment options.

Correct by: Dec 5, 2017

This inspection and exit interview were conducted with facility representative.

Additional inspector
Katie Steneroden, DVM
