

## Inspection Report

Kualoa Ranch Hawaii Inc.  
P.O. Box 650  
Kaaawa, HI 96730

Customer ID: **3413**  
Certificate: **95-C-0048**  
Site: 001  
KUALOA RANCH HAWAII

Type: ROUTINE INSPECTION  
Date: 22-MAR-2017

### 2.40(b)(3) REPEAT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

At the Educational Center, there was a goat named "Benny" that was having some difficulty walking normally upon first rising. Upon closer exam it was discovered that his hooves were over-grown, causing the feet to turn outward.

Failure to properly maintain hooves can result in discomfort, lameness, and could exacerbate underlying problems such as arthritis. Failure to recognize and address problems with the health and well-being of the animals can result in poor outcomes for the animals. All animals should be observed on a daily basis, problems should be recognized, and communicated promptly to the attending veterinarian.

Steps should be taken to ensure that any problems with the animals are recognized in timely manner; addressed with proper husbandry, and / or veterinary consultation when appropriate, and preferably documented so as to show compliance.

### 3.131(a)

#### SANITATION.

In the wooden shelters for the goats and the pig there was an accumulation of straw bedding measuring three to five inches thick. Upon disturbing the bedding it was discovered that the straw was wet, decomposing, and full of insects.

Enclosures should be maintained so that they provide clean and dry shelter for the animals. Failure to replace bedding regularly can result in unsanitary conditions that could be detrimental to the animals, and cause discomfort.

A plan should be implemented to ensure that bedding is changed out on a regular basis.

To be corrected from this time forward.
