Homestead, FL 33034

Customer ID: 868

Certificate: 58-A-0126

Site: 002

MANNHEIMER FOUNDATION INC

Type: ROUTINE INSPECTION

Date: 26-SEP-2016

3.75(c)(1)(ii)

HOUSING FACILITIES, GENERAL.

Many metal sharp points and edges were found at several primary enclosures throughout the facility. All of the sharp points/edges were identified on new and old hose clamps which are used in the construction of primary enclosures. Housing facilities for nonhuman primates (NHP's) must be kept in good repair, and they must protect the animals from injury and contain the animals securely. Primary enclosures for all NHP's at the facility must be free of jagged edges or sharp points that might injure regulated animals. The Site Director and Operations Manager acknowledged the issue and communicated that repairs to eliminate the injury hazard would commence immediately and be completed in approximately six months from the time of this inspection.

To be completed by: February 26, 2017

This inspection and exit interview were conducted with both, Dr. Kelly Hopper, Site Director and Mr. Greg Parmenter, Operations Manager.
