Type: FOCUSED INSPECTION  
Date: 28-AUG-2023

---

### 3.78(d)

#### Outdoor housing facilities.

The facility does not have perimeter fences around two new nonhuman primate enclosures. The licensee recently acquired a young, brown capuchin which is being housed in an enclosure without a perimeter fence. In another area of the facility, a new enclosure was created for the two gibbons, but it is not enclosed by a perimeter fence.

A perimeter fence is important to ensure that the nonhuman primates are protected from unauthorized humans and animals which may intend to have contact with them.

Licensees are required to enclose outdoor housing facilities with a perimeter fence, not less than 6 feet high and not less than 3 feet in distance from the primary enclosure. The fence must be constructed so that it protects the nonhuman primates by restricting unauthorized humans and animals, and must be of sufficient distance from the primary enclosure to prevent physical contact between animals inside the enclosure and animals outside the perimeter fence.

Correct by: December 31, 2023.

This inspection and exit interview were conducted with the licensee.
