Type: ROUTINE INSPECTION
Date: 13-FEB-2020

2.40(b)(3) DIRECT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Chinchillas E1-2077, H1-1655, C1-445, and K1-740 have a milky white discharge coming from both eyes that have caused the eyes to become partially or totally matted shut. The eye issues with discharge and matting can cause pain and suffering. The chinchillas were quiet and withdrawn to the back of their enclosures to avoid light.

Chinchilla E1-1201 had an overgrown left bottom incisor causing the incisor to protrude out of the mouth approximately 1/2 inch interfering with chewing and eating.

All of the health issues identified above are impacting animal health and well being. Daily observation of these animals is not effective. Thus, health issues are not identified within a timely manner and communicated to the attending veterinarian. It is the licensees responsibility to see that daily observations are completed appropriately and effectively. Additionally, there must be a mechanism of direct and frequent communication with the attending veterinarian to ensure all health issues are addressed within a timely manner, to include the animals identified above.

Correct by 18 FEB 2020

This inspection and exit interview were conducted with the facility representative.
