Type: ROUTINE INSPECTION
Date: 16-MAY-2022

3.125(a)

Facilities, general.

The pen housing eight goats is not constructed to contain juvenile goats. The pen is constructed of metal posts and metal panels. The spacing at and near the bottom of the panels is large enough to let juvenile goats through it. A brown/tan juvenile goat was observed outside of the pen during the inspection. All of the animal pens and enclosures are surrounded by a perimeter fence that is constructed to prevent the animals from escaping. Assure the juvenile goats are housed in an enclosure that is constructed to prevent their escape.

Correct by: 6-6-22

This inspection and exit interview were conducted with the facility representative.
