Records are not available. Correct and accurate records are necessary, providing guidance for animal production and welfare. 3.31(a)(1)

Repeat

Sanitation.

A few of the lower Guinea pig pens remain wet and/or heavily soiled. Effected enclosures are too dirty, the guinea pigs are unable to rest in a clean, dry area. A dirty enclosure contributes to animal stress and disease. Primary enclosures shall be cleaned and sanitized often enough to prevent an accumulation of excreta and debris. A program must be developed and maintained which provides effective cleaning and sanitation.

Remains uncorrected
