La Jolla, CA 92037

Customer ID: **328057**
Certificate: **93-R-0547**
Site: 003

I C B INTERNATIONAL INC.

Type: ROUTINE INSPECTION
Date: 27-AUG-2015

3.125(a)

FACILITIES, GENERAL.

In the llama pen, there are at least 3 sections of the wooden fence that are in disrepair and nail heads have become exposed. Animals coming in contact with these areas may become injured. The outdoor housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury.

To be corrected by October 1, 2015

3.131(c)

SANITATION.

In the llama pen, the top and bottom corners of the shelter structures have a moderate to heavy accumulation of spider webs. Spider webs can collect dust, debris and insects which can be harmful to the animals. The walls of the shelters appear soiled and flies are present. Llamas are being fed in one of the shelters and food can become contaminated. Premises should be kept clean in order to facilitate the prescribed husbandry practices set forth in this subpart. A system should be in place to ensure shelter structures are cleaned as often as needed to protect the health of the animals.

To be corrected by September 15, 2015

An exit briefing was conducted with the facility representative.

Accompanied on inspection by Dr. Tyler Fields, Veterinary Medical Officer.

Additional Inspectors

Fields Tyler, Veterinary Medical Officer
