Customer ID: 5720
Certificate: 48-A-1279
Site: 001
IZENE HYNES

Type: ROUTINE INSPECTION
Date: 05-FEB-2015

3.1(a)

HOUSING FACILITIES, GENERAL.

There are wire points protruding into the three enclosures from the wires used to secure the plastic pipe to the divider panels on the outdoor elevated enclosures.

Also two heat lamps in the large dog whelping building are in use where the heat lamp bulbs are not protected from contact with the dogs in these enclosures.

Hot bulbs and wire points may cause injury to the dogs in these enclosures. All housing facilities must be constructed in a manner that protects the dogs from injury.

Correct by 12 February 2015.

3.4(b)(4) DIRECT

OUTDOOR HOUSING FACILITIES.

The dogs housed in approximately 16 outdoor dog shelters are supplied with a limited amount of bedding, but do not have adequate bedding for the current climatic conditions. The temperature at the time of the inspection as recorded by the Inspector's Kestrel was 26.5 degrees F. Lack of bedding can cause discomfort to the dogs and may lead to the dogs not being able to maintain normal body temperature. All shelters must be provided with bedding when temperatures are below 50 degrees F and additional clean, dry bedding when temperatures are below 35 degrees F. Correct by the close of business today.

This routine inspection and exit interview were conducted with a facility representative.

an electronic version of the report dated 5 Feb. 2015.
