WILDLIFE SCIENCE CENTER

Type: RE-LICENSE INSPECTION

Date: 05-OCT-2023

---

### 3.125(a)

#### Facilities, general.

Four enclosures containing a total of 13 wolves, 2 bobcats, and 1 African Crested Porcupine had nail heads or screw heads sticking out of the shelter or wooden structures within the enclosure. In addition, another enclosure containing 1 wolf and 3 wolf/coyote hybrids had a shelter that had a gap in between the side and the top where rainfall could easily get in and flood the shelter. Nail heads or screw heads sticking out creates a hazard for the animals within those enclosures. The animals could potentially step on the nail heads or screw heads and injure themselves. A gap between the side and the top of a shelter doesn't adequately protect the animals in that shelter from the elements of the weather. All nail heads and screw heads sticking out need to either be removed or nailed in/screwed in so they are no longer sticking out. The shelter with the gap between the side wall and top of the shelter needs to either be replaced or the existing shelter needs to be fixed so that gap is no longer there.

Note: All nail heads and screw heads sticking out were either removed or nailed in/screwed in during inspection. The shelter with the gap between the side wall and the top was fixed so the gap is no longer there.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by December 4th, 2023 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.

End of report.
