Type: ROUTINE INSPECTION

Date: 16-AUG-2017

3.84(b)(3)(iii)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The licensee stated that he only uses soap to clean his Lemur (Primate) enclosure. Just soap is not enough sanitization for primates that require a detergent and disinfectant. Sanitization of indoor primate enclosures must be conducted once every 2 weeks. By washing all soiled surfaces with appropriate detergent solutions or by using a combination of detergent and disinfectant product followed by a clean water rinse. The licensee must consult with the attending veterinarian on purchasing an effective sanitizing solution. Then thoroughly scrub the inside floors and walls of the primate enclosure to reduce disease hazards.

Correct by 8-18-2017

(The exit interview was conducted with the licensee).
