

Inspection Report

LEVI KING
759 E END MOUNTAIN RD
MILL HALL, PA 17751

Customer ID: **327993**
Certificate: **23-A-0596**
Site: 002
LEVI KING

Type: ROUTINE INSPECTION
Date: 02-DEC-2022

3.25(a) Repeat

Facilities, general.

Although the side walls of the enclosures measured approximately 7 inches in height, during the inspection, there were 3 guinea pigs observed to be out of their enclosure and running around on the floor of the building.

Guinea pigs that have escaped their enclosure could be at risk of injury or escape from the barn as well as the inability to access food and water.

The enclosure must contain the animals. The licensee must ensure that the enclosure contains the animals at all times and does not allow them to escape.

3.26(a) Repeat

Facilities, indoor.

Although there was a wall heater, the temperature in the guinea pig housing facility was 54 degrees F as measured with a kestrel.

Guinea pigs kept in ambient temperatures that are too low may be subject to cold stress that may cause discomfort and predispose them to developing other health issues.

The ambient temperature in indoor housing facilities for guinea pigs must not fall below 60 degrees F.

This inspection and exit interview were conducted with the facility representative.
