THE FARM AT WALNUT CREEK

Type: ROUTINE INSPECTION
Date: 30-JUN-2014

2.40(b)(2) DIRECT REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

DIRECT: *** One black and white Jacob's ewe is limping on the right front leg and holding its right front foot off of the ground intermittently when standing. The carpus joint on the right front leg is also swollen. This animal requires veterinary attention to determine the underlying problem. Limping is a sign of pain in animals and requires veterinary intervention. Failure to recognize and address veterinary problems in the animals can lead to animal suffering and adversely affect animal health and well-being. Correct this by having this animal examined by the attending veterinarian. All veterinary treatment recommendations must be followed and documentation maintained by the licensee for future inspection by APHIS officials.

*** This animal must be examined by the attending veterinarian by July 4, 2014.

THIS IS A REPEAT NON-COMPLIANT ITEM THAT REMAINS UNCORRECTED

2.75(b)(2)

RECORDS: DEALERS AND EXHIBITORS.

*** There are no records of disposition for the Suffolk sheep that have been removed from this facility. The facility representative stated that he was told by the licensee to only say that the sheep are no longer at the facility. Lack of records and failure to provide information on these dispositions make animal tracking difficult to impossible. There were 50 Suffolk-type sheep on the previous inspection dated June 4, 2014 and only 3 Suffolk-type sheep on hand today. There are 47 sheep unaccounted for, three of which were also found in need of veterinary care on the last inspection. Failure to provide documentation of these animal movements also prohibits APHIS from being able to track animals found in need of care. All future animal dispositions must be documented and these records maintained for APHIS review.

**Correct from this day forward

This was a focused inspection to follow-up on animals found in need of veterinary care on the June 4, 2014

Prepared By: RANDALL COLEMAN, A C I USDA, APHIS, Animal Care

Inspection Report

inspection and to inspect all animals for appropriate veterinary care. The facility provided documentation that the attending veterinarian examined the pygmy goats, the elk, fallow deer #0895, and Suffolk sheep #160 on June 5, 2014. Suffolk sheep #160, #305, and #310 have been removed from the facility.

**Exit interview conducted with the facility representative.
