WEBERS WILDERNESS WALK INC

Type: ROUTINE INSPECTION

Date: 10-JUL-2017

3.130

WATERING.

The enclosure housing the yak and the long horn steer has an area of muddy soil in which the animals have to walk through and stand in to access their automatic water station. Lack of an accessible water source without having to walk through and stand in muddy soil to drink can lead to health problems related to poor water consumption and hoof problems. Develop a method to rapidly eliminate the mud in the area of the water station or develop a method to provide an alternative source of water for the animals. Correct by July 24, 2017.

This inspection was conducted with the Facility Representative.

The exit briefing was conducted with the Licensee and the Facility Representative.

End of report.
