BOAS MARKS BIOMEDICAL SCIENCE

Type: ROUTINE INSPECTION

Date: 01-JUN-2015

### 2.31(e)(4)

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

Item IACUC 2.31 e 4

At the time of inspection protocol 2014-013 was reviewed. The protocol involves surgery in rabbits and indicates the use of buprenorphine with carprofen. A review of the medical records indicates not all the rabbits received the carprofen. In addition the protocol mentions fentanyl may be used, a review of records shows not all animals show the administration of fentanyl with no documentation of whether the animal needed the additional analgesia. Facility needs to ensure the protocol and records reflect the analgesia that was approved by the IACUC and if amendments are submitted they are followed.

Correct from this day 6/1/17

An exit interview took place at the end of inspection
