Type: ROUTINE INSPECTION
Date: 22-MAR-2022

3.30

Watering.

Two guinea pig enclosures had dirty water bowls with feces present in the water. Water receptacles must be placed in or attached to the primary enclosures in a way that minimizes contamination. Water contaminated with feces can cause health and disease risks in the caviary. All water receptacles must be sanitized when dirty. Correct by March 23, 2022.

This inspection and exit interview were conducted with the licensee.
