Customer ID: 1223
Certificate: 91-T-0001
Site: PHX
ALASKA AIRLINES

Type: ROUTINE INSPECTION
Date: 07-MAY-2015

3.14(e)(1)

PRIMARY ENCLOSURES USED TO TRANSPORT LIVE DOGS AND CATS.

***The primary enclosure used to transport 1 Cavalier King Charles Spaniel was not of adequate height for flight 633. The Animal Care Veterinary Medical Officer and Animal Care Inspector observed that the animal was approximately 1 in. taller than the primary enclosure. It must be ensured that primary enclosures used for transporting animals have enough space to ensure that animals can turn about normally while standing, to stand and sit erect, and to lie in a natural position.

3.16(c)

FOOD AND WATER REQUIREMENTS.

***The primary enclosure used to transport 1 Cavalier King Charles Spaniel did not contain the required food and water dishes. Food and water receptacles must be securely attached inside the primary enclosure and places so that the receptacles can be filled from outside the enclosure without opening the door.

This inspection and exit briefing was conducted in terminal 2 with the Veterinary Medical Officer, Animal Care Inspector and shift supervisor.

Additional Inspectors

Moore Chad, Animal Care Inspector
