Steve Berens Animals Of Distinction Inc.  
P. O. Box 773  
Acton, CA 93510

Customer ID: **3634**

Certificate: **93-C-0963**

Site: 001

STEVE BERENS ANIMALS OF DISTINCTION, INC.

Type: ROUTINE INSPECTION

Date: 22-JUL-2015

### 2.40(a)(1)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

At time of inspection, the facility did not have documentation of meeting the regularly scheduled visit to the premises by the attending veterinarian. Their written Program of Veterinary Care(PVC) signed by the attending veterinarian in 2013 requires an annual visit by the veterinarian. The formal arrangement with an attending or consulting veterinarian shall include regularly scheduled visits to the premises, in addition to the written program of veterinary care.

Correction date 22 August 2015

### 3.6(a) REPEAT

#### PRIMARY ENCLOSURES.

Primary Enclosures

-In the yard adjacent to the house where 2 greyhounds were living, there were rusty springs within a wire frame of a mattress that had the potential to injure the dogs. On the gate to the same enclosure, there was chicken wire that had been attached to the gate, but is now hanging loose and dangling off the gate. The greyhounds were jumping up around the gate and there is a potential for injury if they get a paw or a limb tangled in the chicken wire.

-In the cat Taj s enclosure, the plywood board floors are warping on one edge and lifting up, which is starting to expose rusty screws/nails. The junction /gap in the floor makes it difficult for the floor to be readily cleaned and sanitized. An elevated platform in the enclosure has a loose board with 3 rusty nails sticking out where the cat can rub on the sharp points.

Primary enclosures must be constructed and maintained so that they have no sharp points or edges that could injure the dogs or cats, protect the dogs and cats from injury, and enable all surfaces in contact with the dogs and cats to be readily cleaned and sanitized in accordance with 3.11b, or be replaced when worn or soiled. There must be a system of maintenance in place to ensure that primary enclosures are kept in good repair.
