VALLEY OF KINGS SANCTUARY & RETREAT  
W7593 TOWN HALL RD  
SHARON, WI 53585

Customer ID: **2383**

Certificate: **35-C-0005**

Site: 001

JES EXOTICS SANCTUARY

Type: RE-LICENSE INSPECTION

Date: 15-DEC-2021

---

### 2.40(b)(2)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

There was a discrepancy between the dose of medicine prescribed and the dose given to three tigers and a black leopard. During inspection of medications to be distributed to the animals, only one half of the prescribed doses of Enalapril were designated to be given to each animal. The formulation/concentration of the pills in a newer bottle were reportedly half of the concentration from the previous bottle. Distributing incorrect doses of medications could have negative impacts on the animals. Assure animals are receiving the prescribed amounts of medications.

Note: The facility representative contacted the veterinarian and communicated the dose discrepancy. The facility representative also indicated she will confirm the dosage of the medications before distribution from this day forward.

### 3.1(e)

#### Housing facilities, general.

The semi-trailer used to store dog food has several bags of unopened dog food on pallets directly next to the wall. Additionally, several other bags are stored on the aisle way floor. The food must be stored off the floor and away from the walls, to allow cleaning underneath it, around it, and to inspect for evidence of pests.

### 3.125(a)

#### Facilities, general.

## Inspection Report

---

The enclosure containing the female tiger, Tia, is in disrepair. The enclosure is constructed from wood telephone pole type posts and heavy chain link fence. On the northeast side of the enclosure, one inspector was able to move two of the wood posts approximately one to two inches when pushing them. These comprised posts, if not addressed, could potentially affect the safe containment of the tiger.

The enclosure containing the three bobcats has a metal post that has rusted through. The post is located on the center dividing fence, nearest to the shelter. The edges on the rusted post could injure the animals.

Assure all animal enclosures are structurally sound and maintained in good repair to protect the animals from injury and to contain them.

This is a 1st Re-License Inspection for a Class "C" license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by 2-13-22 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Additional Inspectors:

SCOTT WELCH, VETERINARY MEDICAL OFFICER
