Type: ROUTINE INSPECTION  
Date: 07-FEB-2017

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

2.40(b) (2) - Attending Veterinarian and Adequate Veterinary Care- Two syringes were found in the refrigerator with an unknown liquid substance in them. There was also a bottle of Ivomec found in a container. Any and all medications on hand must be labeled by the attending veterinarian. The label must include what medication the medication is, what the medication is used for, what the instructions for use are and when the medication expires. This is a very serious veterinary care issue and could cause injury if the wrong drug is given to the wrong animal. If the medication is expired the medication may not have the expected effect. The licensee must have the AV label all syringes and any future medication dispensed.

Correct by 2-10-2017

### 2.75(b)(1) REPEAT

#### RECORDS: DEALERS AND EXHIBITORS.

Records- Although the records show acquisition and sales for the last few months, there is still information missing. The records are missing animals that were euthanized, born or died. The records must list all acquisitions and dispositions including all euthanasia's, births and deaths of animals. This information is required to track animals in case of disease outbreaks and unlicensed activity. The licensee must provide this information and have it available for Aphis officials to review.

This item remains uncorrected

### 3.125(a) REPEAT

#### FACILITIES, GENERAL.

Facilities, General- Two metal sugar glider enclosures were noted be rusty and their cloth pouches, that they sleep in, have holes in them. Primary enclosures must be maintained so that they are structurally sound and in good repair. The licensee must replace the rusty sugar glider enclosures and any cloth pouches that are in disrepair.

This item remains uncorrected

## Inspection Report

---

### 3.127(b)

#### FACILITIES, OUTDOOR.

Shelter from inclement weather- 8 Patagonian cavy's are housed with only one plastic shelter for them to get out of inclement weather conditions. On this day it poured rain for quite a period of time. It was noted that one cavy was soaking wet and all the rest were dry. This indicates another shelter is needed to allow for all cavies to escape inclement weather conditions. The license must provide an additional enclosure so all the cavies can remain dry.

Correct by 2-10-2017

### 3.127(d)

#### FACILITIES, OUTDOOR.

There is a gate on the back side of the perimeter fence. This gate was left open approximately 18"-24". The perimeter fence protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility. The gates must remain shut to ensure that unauthorized people and animals do not enter the facility and harm the animals.

Correct from this day forward

### 3.131(a)

#### SANITATION.

The hedgehog enclosures and plastic den boxes within their enclosures are dirty and not getting cleaned often enough. There is still dirt and dust that is ground into the plastic den boxes of approximately 110 breeding pair of hedgehogs with 45 babies. The sugar glider enclosures have a coating of grime and old scent marks that are not getting cleaned thoroughly. The licensee must properly clean using an effective sanitizer to remove dirt, dust and old sent marks.

Correct by 2-10-2017

### 3.131(c)

#### SANITATION.

Outside and scattered around the facility are old cages, a lawn mower, trash cans, electrical cords, buckets, transport cages and various items. Premises (Buildings and grounds) shall be kept clean and accumulations of trash plus items not used for the care of the animals shall be placed in designated areas and cleared as necessary

to protect the health of the animal's and facilitate the prescribed husbandry practices. The current animal's on hand need a neat and clean environment to protect them from injury. The licensee must remove all trash and items and place them in one designated area away from animals and keep the area neat and trash free at all times.

Correct by 2-10-2017

(The inspection was conducted with Kurt Hammel, VMO, Carrie Bongard, Animal Care Inspector and Joe Kovach, Animal Care Inspector) (The exit interview was conducted with the licensee and Joe Kovach, ACI).

### Additional Inspectors

Bongard Carrie, Animal Care Inspector

Hammel Kurt, Veterinary Medical Officer
