Type: ROUTINE INSPECTION
Date: 07-AUG-2025

3.127(c)

Facilities, outdoor.

In an outdoor pen housing 3 emus, 7 zebu, 16 goats, 12 geese, and 3 turkeys, there is standing water along the interior perimeter and mud throughout. There is one open shelter made up of a roof and 6 wooden posts that has a small area of dry ground beneath it. The dry area is not large enough for all the animals to stand on it at the same time leaving animals standing in the mud. The animals must also walk through the mud to access food and water. The feet of several animals were noted sinking into the muddy ground. Mud and standing water can lead to discomfort due to soiling of the animals and can contribute to skin and foot issues. Primary enclosures for animals must have a suitable method to eliminate excess water.

To be corrected by October 27, 2025

This inspection and exit interview were conducted with a facility representative.
