### 3.153(a)(1)(ii)

#### Primary enclosures.

One Lady Ross turaco housed with tortoises had access to two radiant heat lamps and their electrical power cords used to provide a basking area for the tortoises. Heat lamps can produce burns if the bird touches the surface, and access to power cords risks shock if the cord is manipulated by the bird. The facility must ensure that the enclosure protects the bird from injury.

Correct by 11/28/2023.

This inspection and exit interview were conducted with the facility representative.
