3.125(a)

FACILITIES, GENERAL.

Chicken wire surrounded the inside of the enclosure containing the goats. Throughout the enclosure, the chicken wire had been mangled and sharp points were protruding inward. Sharp points can cause injury to the animals within the enclosure. The chicken wire needs to be fixed and maintained in good repair to protect the animals from injury. Correct by 9/22/16.

3.130

WATERING.

The enclosure containing the goats had two receptacles for water. One of the watering receptacles was green in color. It also had bugs (appeared to be mosquitoes) swimming around in it. Unsanitary water could be contaminated with various types of parasites which could cause illness or disease for the goats. All watering receptacles shall be kept clean and sanitary. Correct immediately.

This inspection and exit interview were conducted with the facility representative.

End of report.
