2.75(b) REPEAT

RECORDS: DEALERS AND EXHIBITORS.

The required records were not available for review at the time of inspection.
The AWA regulations include specific recordkeeping requirements. These records must be made available for review
at inspections to allow for evaluation of the compliance of the facility.

3.131(d)

SANITATION.

The food prep area had excess flies. While fly control measures - such as sticky trap line strung across the room - were in place, they are evidently inadequate.
Flies contaminate surfaces and food receptacles, which can result in disease and suffering for the animals.
Correct in 30 days, by 9/17/2015.

The inspection and exit briefing were conducted with facility personnel.
