Site: 001
Barn Babies LLC

Type: ROUTINE INSPECTION
Date: 17-JUL-2025

3.6(a)(2)(ii)

Primary enclosures.

The "Cat Barn" houses cats. Most of the cats have free access to the entire space inside the structure and the "Cat Barn" serves as the cats' primary enclosure. There was a spray bottle of Simple Green cleaner hanging next to one of the elevated resting surfaces and a cat bed was located on top of the resting surface.

Per this Section, primary enclosures must be maintained so that they protect the cats from injury. Simple Green is an all-purpose cleaning product that should not be kept out in a space that serves as the cats' primary enclosure. Cleaning products may cause irritation to animals from contact with the fur/feet/skin or if ingested during self-grooming/licking. This item was immediately corrected during the inspection by putting the spray bottle into a closed cabinet. To remain corrected from this date 7/17/25 forward.

3.13(b)(3)

Veterinary care for dogs.

Dog #487 was examined by a veterinarian on 3/25/25 for an eye condition. Oral and topical medications were prescribed and the eye condition subsequently resolved. The Licensee kept a daily record of the dates that the prescribed medications were administered but they discarded the record after the treatment was completed and did not retain a copy.

Per this Section, exhibitors must keep copies of medical records for dogs and if a problem is identified (such as a disease, injury, or illness), the medical records must include the names of all treatments administered and the dates of administration of the treatments. Medical records document the medical care provided to the dogs and are reviewed at the time of an inspection to assess compliance with the AWA Regulations and Standards. Correct from this date 7/17/25 forward by maintaining a copy of the records kept that document the dates and names of medications administered to the dogs.

This inspection and exit briefing were conducted with facility representative.
