404500 E 1020 Rd  
Henryetta, OK 74437

Customer ID: **6018208**  
Certificate: **73-C-0268**  
Site: 001  
Christina Brasfield

Type: ROUTINE INSPECTION  
Date: 12-MAY-2025

---

### 3.131(a)

#### Sanitation.

- There was an excessive accumulation of feces in a pen containing 3 young lynx and one young bobcat. Much of the feces had turned dry and white which is an indication that the fecal matter had been present for an extended time. Accumulation of waste is a potential source of contamination to the enclosed animals. It is also an attractant to flies and pests, and is a source of noxious odors. Excreta shall be removed from primary enclosures as often as necessary to prevent contamination of the animals contained therein and to minimize disease hazards and to reduce odors. Corrected at the time of inspection

This inspection and exit interview were conducted with licensee.
