

## Inspection Report

---

COLEMAN PHIFER  
13375 NC Hwy 801  
Mt. Ulla, NC 28125

Customer ID: **502638**  
Certificate: **55-B-0225**  
Site: 002  
Coleman Phifer

Type: ROUTINE INSPECTION  
Date: 20-DEC-2022

---

### 2.40(b)(2)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A Tahr goat was observed to be lame during inspection. The goat carried the front left leg when running but was able to use the limb when standing still. The licensee had not observed the lameness until this inspection. The licensee contacted the attending veterinarian (AV) during the inspection and a treatment plan was implemented. Per the regulations, each dealer or exhibitor shall establish and maintain programs of adequate veterinary care that include the use of appropriate methods to prevent, control, diagnose, and treat diseases and injuries, and the availability of emergency, weekend, and holiday care. Corrected during inspection.

### 2.75(b)(1)

#### Repeat

#### Records: Dealers and exhibitors.

Acquisition records for one large acquisition for 63 animals were not available for review by the inspector during this inspection. Disposition records for 26 animals were not available for review during inspection. Missing records can put the animals' health at risk due to the inability to track the transport and location of animals. Per the regulations, each dealer shall make, keep and maintain records or forms which fully and correctly disclose the items contained in (b)(1)(i-vii) for all animals acquired or disposed by the dealer.

This inspection and exit interview were conducted with the licensee.
