Site: 001  
Evelina Galitckaia

Type: ROUTINE INSPECTION  
Date: 30-JUN-2025

---

### 2.80(b)

#### Records, disposition.

The transporter has not maintained records for the dogs that they have transported within the past year. Failure to maintain the required recordkeeping information for the required amount of time can inhibit accurate identification and tracking of animals. The facility must make, keep, and maintain all records or forms required by this subpart for a period of 1 year after an animal is delivered, euthanized, or disposed of and for any period in excess of one year as necessary to comply with any applicable Federal, State, or local law. To be corrected by 7/20/2025.

### 2.134

#### Contingency planning.

The transporter does not have a contingency plan. Not having a contingency plan could result in the inability of the registrant to respond to emergencies while transporting animals. Intermediate handlers must develop, document, and follow an appropriate plan to provide for the humane handling, treatment, transportation, housing, and care of their animals in the event of an emergency or disaster. To be corrected by 7/20/2025.

### 3.14(c)

#### Consignments to carriers and intermediate handlers.

The transporter reports they accepted a dog for transport on June 17th, 2025, without signed certification from the consignor that the dog was offered food or water before transport. The missing certification also means that the transporter did not have the dog's identification, the date and time the certification was signed, and specific written feeding and watering instructions for the transport attached to the enclosure. Not having this certification could lead to incorrect feeding and/or dehydration or discomfort for the dog during transport. Intermediate handlers must not accept a dog for transport in commerce unless the consignor certifies in writing to the intermediate handler that the dog was offered food and water during the 4 hours before delivery to the transporter. This information along with all the required information in 3.14 must be securely attached to the outside of the primary enclosure in a manner that makes it easily noticed and read. To be corrected by 7/20/2025.

### 3.15(a)

#### Primary enclosures used to transport live dogs and cats.

## Inspection Report

---

The transporter is not using a primary enclosure to transport dogs. The dogs that they transport are on a supported dog bed and secured with a seatbelt in the back seat of the car. Failure to transport a dog in a primary enclosure could lead to escape or injury. Any person subject to the Animal Welfare regulations must not transport or deliver for transport in commerce a dog or cat unless it is contained in a primary enclosure such as a compartment, transport cage, carton, or crate. To be corrected by 7/20/2025.

### 3.18(d)

#### Care in transit.

The transporter removes the dog from the back seat of the car for eliminations during stops. If the dog is out of the primary enclosure, it could escape or be injured. Removal from the primary enclosure during transportation in commerce is prohibited (except during cleaning as required in 3.15) unless it is placed in another primary enclosure or a facility that meets the requirements of 3.6 or 3.15. To be corrected by 7/20/2025.

This inspection and exit interview were conducted with the registrant.
