### 3.14(c)(3)

#### Consignments to carriers and intermediate handlers.

A 3 year old American Bully, "Tunda," was transported from Honolulu to Boston on flight HA090 on May 31st, 2023 (AWB 173-11228571). On the exterior of the enclosure, there was a "Live Animal Checklist" form with a space for a certification by the consignor of the last time food and water was offered and for feeding instructions over a 24 hour period, but that section of the form was blank. The dog was transported without this required information. The certification and feeding and watering instructions are important to ensure an animal being transported is offered food and water with sufficient frequency to provide for the animal's health and well being.

Carriers and intermediate handlers must not accept a dog for transport in commerce unless the consignor certifies in writing that the dog was offered food and water within 4 hours of transport and provides specific instructions for feeding and watering in a 24 hour period. The certification and instructions must be securely attached to the outside of the enclosure and easily read.

This inspection and exit interview were conducted with airline representatives.
