Certificate: **74-A-1536**  
Site: 001  
STEPHANIE ATWOOD

Type: ROUTINE INSPECTION  
Date: 21-AUG-2019

### 3.1(c)(3)

#### HOUSING FACILITIES, GENERAL.

The floor inside the mobile home where the smaller dog kennels are kept was extremely dirty. It appears the dogs are allowed to run around loose in the trailer occasionally. Some areas had dog feces that had been trampled flat. The walls were also dirty. The dog kennels themselves were clean. Hard surfaces with which the dogs come in contact must be spot-cleaned daily and sanitized at least once every 2 weeks or more often if necessary.

All surfaces in the trailer that the dogs have contact with must be cleaned and sanitized as often as necessary to prevent an accumulation of dirt, debris, food waste, and excreta which can contribute to illness and disease in the animals.

To be corrected by: Sept 1, 2019

### 3.11(a)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

The primary enclosures for the outside dogs did not appear to have been cleaned in some time. There was a large accumulation of feces that had been trampled flat in at least one enclosure. Excreta and food waste must be removed from primary enclosures daily. Primary enclosures must be sanitized at least once every 2 weeks.

All dog enclosures must be spot cleaned daily and sanitized as often as necessary to prevent an accumulation of dirt, debris, food waste, and excreta which can contribute to illness and disease in the animals.

To be corrected by: Sept 1, 2019

This inspection and exit interview were conducted with the licensee.
