2.75(b)(1)

Records: Dealers and exhibitors.

The facility did not have records demonstrating any of the acquisition information for the birds currently on-hand. Complete and accurate animal records must be kept in order to facilitate tracing of animals in the event of an animal disease outbreak. Records must be maintained that fully and correctly disclose information concerning all covered animals purchased or otherwise acquired, owned, held, leased, transported, sold, euthanized or otherwise disposed of and shall include any offspring born while in the licensee's possession.

Primary enclosures.

Sharp points were found in 3 enclosures containing birds. There was patch of wire mesh (approximately 8inch by 8inch) on the top of the entranceway into the great-horned owl enclosure. There was a similar finding in the enclosure housing 2 turkey vultures. In both enclosures the wire mesh had bent up exposing the sharp points to the inside of the cage and were directly under a central perch. In the western screech owl enclosure, 3 sections of inner wall had degraded wooden supports and the sharp points of the bolts were exposed. All of the birds were free in each the enclosures with access to the sharp points. The primary enclosure must be constructed and maintained so that they have no sharp points that could potentially injure the birds.

Environment enhancement to promote psychological well-being.

The facility did not have a documented environment enhancement plan to promote psychological well-being of their avian species as required by the Animal Welfare Act. The facility must develop, document and follow a species appropriate plan for environmental enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian, and at a minimum must address social grouping, environmental enrichment, special considerations, restraint, and exemptions to the plan regulation and be in accordance with currently accepted professional
