Certificate: **74-C-0788**

Site: 001

International Exotic Feline Sanctuary

Type: ROUTINE INSPECTION

Date: 20-JUL-2016

3.125(a)

FACILITIES, GENERAL.

One of the bear enclosures is being accessed through a single gate without securing the bears prior to entering the enclosure. This is an extremely dangerous situation for both the keepers and the visiting public. The bears could seriously injure a keeper while they are in the enclosure feeding or cleaning. Or, they could push through the single gate as keepers are entering or exiting the enclosure and have access to public areas.

The bears need to be secured so that there is a fence between them and the keepers prior to the keepers entering the enclosure. The bears should never have direct access to a keeper or an open gate between the exhibit and non-exhibit area.

To be corrected by: Dec 1, 2016

Inspection and exit interview conducted with the licensee.
