Type: ROUTINE INSPECTION
Date: 18-APR-2022

2.75(a)(1)

Records: Dealers and exhibitors.

While reviewing the records for the newly acquired Bengal kitten (F9). It was noted that it was purchased from a local breeder. A Driver's license number was documented. However, a vehicle plate number was not obtained. All records need to be accurate and complete for all animal transfers.

Repeat

Handling of animals.

During this inspection we observed two Sloth encounters. The newly hired employee conducted an encounter with a couple and then with a family of four. During the encounters we noticed that the public was allowed to interact with the sloth while the employee was approximately 5' away and had no means of ensuring minimal risk of harm to the sloth and the public while conducted the public interaction. Lack of sufficient control poses a risk of harm to the animals and the public during public interactions.

3.55

Watering.

At the time of this inspection, it was noted that the rabbits did not have food or water in their enclosure. In speaking with the staff, we were informed that they get fed at night, but water is always provided to them in the large black tubs. We

3.131(a)

Sanitation.

The otter enclosure, and the area around their den box, had an accumulation of feces, shells, small fish and debris present, and there was an unpleasant strong odor noted when standing next to the enclosure and den box. It was apparent that the enclosure had not been cleaned yet today. All enclosures need to be cleaned to minimize disease hazards and to reduce odors.

Repeat

Sanitation.

At the time of this inspection there were 2 bags of vermiculite and a flat, metal scale within the sloth enclosure. These items were to the left of the bench and the door on the left side of the enclosure. This sloth had direct access to these items if he chose to come down from his perches. The enclosures shall be kept clean in order to protect the animals from injury and to facilitate the prescribed husbandry practices. The animal enclosures are only for the animals, all supplies and occasionally used equipment need to be stored elsewhere.

3.131(d)

Sanitation.

During this inspection it was noted that there was a large population of fruit flies present. They were seen in animal enclosures, and especially in the food prep / kitchen area. Fly strips were in place but they were very full. However, there
