Glen, NH 03838

Customer ID: **1858**
Certificate: **12-C-0052**
Site: 001
FESTIVAL FUN PARKS LLC

Type: ROUTINE INSPECTION
Date: 19-SEP-2023

3.150(a)

Facilities, general.

The lorikeet aviary includes a tortoise pen with heating lights that the birds have access to. Temperature measured at the surface of one light with an IR temperature probe was 208 F, hot enough to burn and injure the birds should they come into contact with the lamp. The facility must ensure that the birds are protected from injury within their aviary.

Correct by 21 Sept 2023

2.126(a)(2)

Access and inspection of records and property; submission of itineraries.

Required complete records including the avian enrichment plan were not available for review at the time of inspection. These documents serve to provide instruction for necessary and appropriate animal husbandry, veterinary care tasks, and ensure accountability for animal inventory. The facility must ensure that these documents are completed and available for review at the time of inspection.

Correct by October 19, 2023.

3.131(c)

Sanitation.

Two freezers used to store animal food had patchy black material adhered to the door seals, and one of those freezers had an accumulation of food debris on the floor of the unit. An accumulation of waste feed and mold on the freezers used to store animal feed may contaminate the food or prevent proper functioning of the unit. The facility must ensure that equipment used for storage of food is kept clean.

Correct by 21 September 2023.

3.150(c)(2)

Facilities, general.

Inspection Report

All walls in the aviary were damaged and had evidence of chewing and wear down to the underlying drywall, preventing proper cleaning and sanitation. The rubber seal around the aviary doors was not intact, and appeared to be damaged by chewing. Exposed and damaged surfaces can harbor microorganisms and may expose birds to toxic materials when chewed on, which may adversely affect animal welfare. The facility must ensure the the surfaces are kept in good repair.

Correct by October 19, 2023.

This inspection and exit interview were conducted with the facility representatives.
