Type: ROUTINE INSPECTION
Date: 19-JUN-2014

3.131(a)

SANITATION.

All pens in the weaning barn have a build up of manure and urine . Most of the pigs housed in these enclosures have manure caked on their bodies. Licensee states the barn is cleaned about every 3 days . An accumulation of manure to this extent does not provide a healthy environment for the pigs.Cleaning more frequently will minimize disease ,odors and prevent contamination of the animals. Enclosures housing animals must be cleaned as often as necessary to prevent a build up of manure and contamination of the animals

CORRECY BY : 6-20-14

The inspection was conducted with the owner's son.
