City Of Clay Center
Post Office Box 37
Clay Center, KS 67432

Customer ID: **4099**
Certificate: **48-C-0017**
Site: 001
City of Clay Center

Type: ROUTINE INSPECTION
Date: 11-MAR-2015

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

There are two rabbits with areas of hair loss. One of the rabbits (gray) has the majority of its hair loss on the right rear outer leg, which is almost completely bald. The other rabbit (brown) has "patchy" hair loss on the left shoulder, side, and hip. While rabbits can pull their hair to use as a nest liner as suspected by the facility representative, hair loss can also result from medical problems such as parasites, infection, and nutritional deficiencies. The licensee must have these animals examined by a licensed veterinarian by 18 March 2015 in order to ensure that an accurate diagnosis is obtained and that an appropriate treatment plan is developed and followed. The licensee must document the outcome of this consultation and make it available to the inspector upon request.

3.56(a)(1)

SANITATION.

The floor of one of the two shelter structures provided in the outdoor rabbit enclosure is completely covered with a layer of excreta and dirt. Lack of cleaning along with accumulation of excreta can play a role in disease transmission. In addition, accumulation of feces can cause the animals to become soiled. The licensee must keep all enclosures reasonably free of excreta with periodic cleaning. To be corrected by 13 March 2015.

The inspection and exit interview were conducted with the facility representative, Kendall Lundy, ACI and Margaret A Shaver, VMO in attendance.

Additional Inspectors

Lundy Kendall, Animal Care Inspector

Prepared By: MARGARET SHAVER, D V M USDA, APHIS, Animal Care
