LIVESTOCK SUPPLIES INC

Type: FOCUSED INSPECTION
Date: 31-AUG-2021

3.36(g)

Primary enclosures used to transport live guinea pigs and hamsters.

At the time of this inspection it was noted that the transport crates were in need of attention. The "Live Animal" labels and Arrow decals were either missing or partially visible. All primary enclosures used to transport guinea pigs / hamsters shall be clearly marked on top and one or more of the sides with the words "Live Animals" in letters not less than 1" in height. There also needs to be arrows to indicate the correct upright position. To ensure the safety of the animals, these labels need to be added to each of the enclosures.

***To Be Corrected By: The next shipment of animals

3.37(d)

Primary conveyances (motor vehicle, rail, air, and marine).

While inspecting the van, it was noted that the side door could not be open. It was apparent that the animal crates were leaning up against the door. If the side door was opened the crates could possibly fall out. Enclosures should be positioned in the transport vehicle in such a manner that in an emergency the animals can be removed as soon as possible. This situation only allows for the crates to be removed via the back door. This situation will need to be addressed.

***To Be Corrected By: The next shipment of animals

Inspection Report

Handling.

At the time of this inspection it was noted that the crates had shifted during transit. There were crates that had slid into the middle of the van. There were also crates that had slipped off the crates below them. This resulted in crates partially hanging off the crates below them and other crates blocking some of the ventilation openings. Animal enclosures shall not be stacked in a manner which may reasonably be expected to result in their falling. This situation will need to be addressed.

***To Be Corrected By: The next shipment of animals

This inspection was conducted at a USDA licensed facility in CT. While I was conducting an inspection at the CT facility this licensee was making a delivery.

An exit interview was conducted with the driver on Aug 31, 2021 and another exit interview was conducted with the owner on Sept 1, 2021.
