SOCIETY

Type: ROUTINE INSPECTION

Date: 28-JUN-2022

---

### 3.80(a)(1)

#### Primary enclosures.

There are two feeders in Gorilla holding that have broken concrete above the feeders creating sharp edges where food enters the primary enclosure. The facility had placed a work order in to have the area repaired over a year ago, but the project was moved down in urgency. The system of identifying and making repairs for animal primary enclosures should be reevaluated to ensure that when these issues are identified they are placed at an appropriate priority level for completion. These sections of concrete must be maintained in good repair to keep the area structurally sound and safe for the animals.

Correct by: July 31, 2022

This inspection and exit interview were conducted with the Curator of Herps, Birds and Others.
