Certificate: **35-C-0416**  
Site: 001  
Pecks Farm Market II East LLC

Type: ROUTINE INSPECTION  
Date: 03-JUL-2024

---

### 3.125(c)

#### Facilities, general.

The grain storage for deer has broken bags and spilled feed around it from what the representative said is a squirrel that has been getting into the bags. Wild animals getting into feed can contaminate it and cause animals to get sick. Ensure to store feed in a manner that protects it against deterioration, molding, or contamination by vermin.

\*\*\*Correct by July 15, 2024.

### 3.154

#### Environment enhancement to promote psychological well-being.

The facility provides areas for species typical behavior and social behaviors for their birds, however a written plan for environment enhancement that is approved by the attending veterinarian (AV) was not available for inspection. Following a written plan that is approved by the AV helps ensure that each species of birds is being provided with adequate environmental enhancement. Ensure that a plan is developed and approved by the AV and is available for future inspections.

\*\*\*Correct by August 16, 2024.

### 3.156

#### Watering

A group of peafowl and guinea fowl have access to a pool of water that ducks swim in and is refreshed by continuous artesian flow, however the water is on the ground and so is not potable water. Having drinking water access limited to ground/pool water access rather than potable water could cause health problems in birds. Potable water must be provided in sufficient quantity to every bird housed at the facility, unless restricted by the attending veterinarian. Ensure each bird has access to potable drinking water.

\*\*\*Correct by July 4, 2024.

This inspection and exit interview were conducted with a facility representative.
