Site: 002

NOMAD'S ANIMAL ENCOUNTER  
LLC

Type: ROUTINE INSPECTION

Date: 11-FEB-2025

---

### 3.131(a)

#### Sanitation.

- In the indoor barn, a cage housing a mongoose had an excessive accumulation of food scraps, waste, and debris. This is a source of potential contamination to the animal. The facility must clean this enclosure, and maintain it at an appropriate level of cleanliness to protect the health and welfare of the animal.  
Corrected at the time of inspection

### 3.131(d)

#### Sanitation.

- The food preparation area was cluttered and in need of cleaning. There were numerous dirty bowls waiting to be washed, and there was spilled feed on the ground next to the prep table. A live mouse was spotted in this area during inspection. These conditions serve as an attractant for pests and insects, which are a potential source of contamination to animal feed. The facility must clean this area, and maintain it an appropriate level of cleanliness in the future.  
Correct by: 15 February 2024

This inspection and exit interview were conducted with licensee.
