Certificate: **33-C-0477**  
Site: 001  
JOHAN MOMMENS

Type: ROUTINE INSPECTION  
Date: 01-AUG-2018

### 3.78(d)

#### OUTDOOR HOUSING FACILITIES.

The facility has constructed a new outdoor enclosure and perimeter fence since the last inspection. Although the the perimeter fence is of sufficient height (six feet), it doesn't entirely surround the outdoor enclosure. The perimeter fence stops approximately four feet short of where it would connect to the facility wall, midway and perpendicular to a set of concrete of stairs that lead down to the basement. The lack of a continuous perimeter fence could allow unauthorized persons and animals to access the outdoor enclosure.

Assure the perimeter fence is constructed to prevent unauthorized persons and animals from going around it or through it.

To be corrected: 10-2-18

Note: The licensee indicated he will apply for a variance.

This inspection and exit interview were conducted with the owner.
