MARGARET COOK & WILLIAM PETERS

Type: ROUTINE INSPECTION
Date: 15-MAR-2017

2.50(a)(2)

TIME AND METHOD OF IDENTIFICATION.

***Three litters of puppies, dates of birth of 2/13/17, 2/16/17, and 2/24/17, were housed in the newest sheltered whelping building with their dams. The enclosure cards posted for each of these litters did not contain the the required identification numbers for the enclosed puppies. All puppies must be identified by an enclosure card, tag, collar or microchip to to reduce misidentification and facilitate record keeping. To be corrected by: 03/20/17

3.2(d)

INDOOR HOUSING FACILITIES.

***A new construction was observed on this inspection. This new building will be utilized as an indoor puppy rearing building for weaned puppies. The building floor surface is comprised of compressed gravel flooring. The puppies will have direct access to this gravel flooring surface. This surface is not impervious to moisture. Surfaces in contact with the puppies must be impervious to moisture as well as all floor surfaces in indoor kennel areas. Surfaces not impervious to moisture are not easily cleaned and sanitized and pose disease, odor and pest risks to the dogs. To be corrected by:04/15/17

3.4(b)(4)

OUTDOOR HOUSING FACILITIES.

***The northwestern building contained 14 adult dogs. The dog shelters provided for these pens did not contain an adequate amount of bedding and at the time of inspection the ambient temperature in these enclosures was approximately 40 degrees F. The facility does make use of electric heating lamps to provide auxillary heat. At the time of inspection the outdoor temperature was approximately 28 degrees F. Bedding must be provided to the shelters to allow the dogs to nest in to conserve body heat. Bedding must be maintained clean and dry. To be corrected by: 03/16/17

This inspection and exit interview was conducted with the owner by Curt McGruder-ACI.

Note: Viewed new construction and discussed possible corrections and correction dates.
