

## Inspection Report

Steve Yoder  
6230 East Moreland Road  
Fredericksburg, OH 44627

Customer ID: 31202  
Certificate: 31-A-0190  
Site: 001  
STEVE YODER

Type: ROUTINE INSPECTION  
Date: 18-MAY-2017

### 3.6(a)(2)(ix)

#### PRIMARY ENCLOSURES.

The floors, walls and doors on the primary enclosures in the front room (whelping area) of the building were moderately worn. The primary enclosures in this area are constructed of primarily of coated wire. The wire coating has been worn or chewed off over portions of the floors, walls and doors. These areas of the kennel are no longer in good repair. The areas where the coating is damaged provide crevices that organic material can become entrapped preventing adequate cleaning and sanitization. Additionally, the rust which has formed over the exposed wires also prevents them from being readily cleaned and sanitized. Correct by repairing or replacing these damaged areas. All surfaces in contact with the dogs must be readily cleaned and sanitized in accordance with Sec. 3.11 (b) of this subpart, or be replaceable when worn or soiled.

Correct by: 18 July 2017.

### 3.11(a)

#### CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

During the inspection it was noted that the wash-down areas had a heavy buildup of tan matter. There was a moderate amount of feces and urine present within the wash down area. This buildup is an indicator of dried urine and feces that has built up over time. Improper cleaning and sanitization of the wash down contributes to the odor and disease hazards within the facility. This facility must establish and maintain a routine for proper cleaning and sanitization for the facility to include all wash downs.

Correct by 8 June 2017.

This inspection and exit interview were conducted with the Licensee's wife.
