

## Inspection Report

Pamela Robertson  
6109 Hwy 11 W  
Pittsburg, TX 75686

Customer ID: **326565**  
Certificate: **74-B-0685**  
Site: 001  
Pam Robertson

Type: ROUTINE INSPECTION  
Date: 04-FEB-2014

### 3.126

#### FACILITIES, INDOOR.

( b ) Ventilation.

\*\*\*\*\* At time of inspection the building housing the lemurs had upon entering a strong ammonia odor which caused inspectors eyes to burn and tear and nose to burn. This building currently exhausts odors through the use of windows, a door and has an exhaust fan which is turned on manually. There is need for additional ventilation. It was discussed with the licensee that perhaps the exhaust fan being put on a timer system to come on automatic for additional periods of time may be a solution. If not then additional ventilation would need to be provided. Additional ventilation will help to reduce discomfort to the animals and aid in helping to keep the animals in good health.

TO BE CORRECTED BY: 5/7/14

### 3.131

#### SANITATION.

( a ) Sanitation, Cleaning of enclosures.

\*\*\*\*\* At time of inspection the chainlink enclosures housing the lemurs located on the west wall of the lemur building had an accumulation of excreta, food and dirt on the framework of the enclosures which needs to be cleaned and sanitized which will aid in reducing odors and will help to minimize disease hazards.

TO BE CORRECTED BY: 2/21/14

This inspection and exit interview conducted by APHIS, USDA, Animal Care Inspectors and the Owners.

END OF REPORT.
