Type: ROUTINE INSPECTION

Date: 18-APR-2023

3.125(a)

Facilities, general.

On February 28, 2023, at about 3:30pm, a female cheetah escaped the primary enclosure. The cheetah presumptively escaped through a section on the backside of the enclosure where the exhibit wall was approximately 7' feet tall with a three-foot kick-in. The kick-in consisted of three cables and a hot wire on three-foot extensions that were at an 8-degree angle out from the wall, and it is assumed that the cheetah escaped through the wires. The animal care staff were able to get the cheetah to return to her enclosure within 30 minutes without further incident.

The enclosure did not contain the animal. The cheetahs were held in off-exhibit areas until the enclosure wall could be modified and thus was corrected prior to the time of inspection.

This inspection and exit interview were conducted with a facility representative.

Additional Inspectors:

William Janecke, VETERINARY MEDICAL OFFICER
